Search and Discovery of Geoscience Information

The ESS Data Discovery Tool (ESSDDT) will be ESS's CGKN node to ESS data.

We will be looking at present and future developments.

First, the current state of the tool.

Search and Discovery of Geoscience Information

We are using ESRI ArcIMS technology to develop this application.

There are two parts to the tool. The first is the Metadata explorer, the second is a map browser.

We will first look at the Metadata explorer.

Map tool demo.

Search and Discovery of Geoscience Information

Combined tool demo.

Search and Discovery of Geoscience Information

Future Direction

Z-Server

GeoInnovations project with ESRI.

Continue work based on the prototypes we developed.

Search and Discovery of Geoscience Information

Thank you.
